

Antenna manufacturing

Labtech Microwave is one of the world's leading manufacturers of complex and high technology active and passive antenna structures, with an established pedigree, which spans more than 20 years. Providing specialist solutions for a range of markets, Labtech Microwave offers a wide range of complimentary microwave PCB capabilities from a purpose built factory located in Wales, UK. Through comprehensive project management and support, Labtech has an unrivalled ability to meet full prototype-to-volume production requirements.

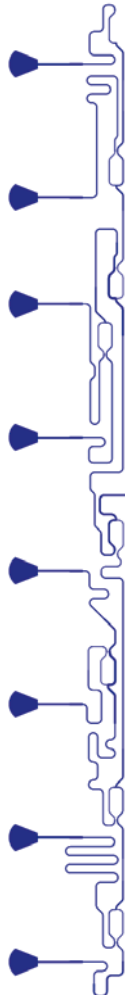

Antenna manufacturing capabilities

- 2.0 metre x 0.6 metre
- PTFE, LCP & Mixed dielectric materials
- Multilayer builds
- Foam dielectric
- Kapton / flexible layers
- Blind, buried vias, sequential builds
- Metal backed
- Embedded resistors and capacitors
- Integrated wave-guide feeds
- Integrated connector assemblies
- Omega-ply
- High tolerance capabilities & features
- Precision laser machined pockets and features

Quality & environment

- ISO9001:2000
- ISO14001
- European space agency approval
- RoHs compliant
